

White, 1665.

A New  
ALMANACK

For the year of our Lord God,  
1665.

Being the year from the worlds  
Creation 5628.

And the first from Bissextile, or Leap-year.  
Calculated and properly referred

to the Meridian of *Todington in Bedford-*  
*shire*, where the north pole is elevated  
above the horizon 52. degrees and 8. mi-  
nutes, so that it may serve for all parts  
of *England*, without any sensible error.

---

By William White.

---

*Laudate eum Sol & Luna, Laudate eum omnes  
stella lucis, Psalm 148. 3.*

Since Dunkirk taken by the Spaniards	13
Since the Act for Marriages	12
Since King Charls 2. returned to London, May 29.	5
Since King Charls 2. was Crowned, April 23.	4

**A Table to know when the terms begin and end, and the number of their Returns, with the day of the moneth whereon they will be this present year, 1665.**

<i>Hillary Term begins the 23 of January, and ends the 13 of February, and hath 4 Returns, Viz.</i>		<i>Oftab. Hillarii</i>	<i>January 20</i>
		<i>Quind. Hillarii</i>	<i>Jan. 27</i>
		<i>Craft. Purif.</i>	<i>February 3</i>
		<i>Oftab. Purif.</i>	<i>February 10</i>

<i>Easter Term begins the 12 of April, and ends the 8 of May, and hath five Returns, Viz.</i>		<i>Quind. Pasche</i>	<i>April 10</i>
		<i>Tres Pasche</i>	<i>May 17</i>
		<i>Mens. Pasche</i>	<i>May 24</i>
		<i>Quind. Pasche</i>	<i>May 1</i>
		<i>Craft. Ascens.</i>	<i>May 5</i>

<i>Trinity Term begins the 26 of May, and ends the 14 of June, and hath 4 Returns, Viz.</i>		<i>Craft. Trinit.</i>	<i>May 22</i>
		<i>Oftab. Trinit.</i>	<i>May 29</i>
		<i>Quind. Trinit.</i>	<i>June 5</i>
		<i>Tres Trinit.</i>	<i>June 12</i>

<i>Michaelmas Term begins the 23 of October, and ends the 28 of November, and hath 6 Returns, Viz.</i>		<i>Tres Mich.</i>	<i>Oftob. 21</i>
		<i>Mens. Mich.</i>	<i>Oftob. 28</i>
		<i>Craft. Animar.</i>	<i>Novemb. 3</i>
		<i>Craft. Mart.</i>	<i>Novemb. 12</i>
		<i>Oftab. Mart.</i>	<i>Novemb. 18</i>
		<i>Quind. Mart.</i>	<i>Novemb. 25</i>

1665.

The Golden number	13
The Circle of the Sun	22
The Dominical Letter	A
The number of Direction	5.

Of the Eccleses this Year. 1665.

**F**ive times this year will the Luminaries be Ecclesed, thrice the Sun, and twice the Moon; but those of the Moon will only be visible to us.

The first Ecclesie will be of the Sun, on *Friday* the 6 of *January*, at 7 a clock in the morning; but cannot be seen of us, yet in *Arabia* the happy, and the adjacent places it will be conspicuous, as also in *Ormus*, *Zacotora*, the Garden of *Eden*, *Meren*, *Siras*, *Palandare Insula*, and other places lying in the *Indian Ocean*.

The second is a visible Ecclesie of the Moon on *Saturday* the 21 of *January* in the morning, the beginning at 3 minutes past 4 in the morning, the greatest obscuration 9 minutes past 5, the true opposition 6 minutes past 6, the end 5 minutes past 7, the digits Ecclesed 4 and 53 minutes.

The third Ecclesie is of the Sun, the 2 of *July* in the afternoon, to be seen in the Province of *Mexicana*, in *Nova Hispania*, *Gulf of Mexico*, *Granada*, *Insulis de Cocos*, &c.

The fourth is a small Ecclesie of the Moon, upon *Sunday* night the 17 of *July*, which will be visible in our Horizon 16 minutes past midnight

The fifth and last is a great Ecclesie of the Sun, on the 26 of *December*, about 9 a clock in the Morning, to be seen of the people in the Southern parts of *Africa*, in the Islands *Madagascar*, *de los Romeros*, and in other places more West, not far from the *Promontory of Good-hope*, in the *Athiopian Ocean*

# January hath xxxj. dayes.

The old year's past, the new doth now begin,  
Put off the old man, abandon deadly sin:  
Such as determine in their sins to dwell,  
There is no hope but they run post to hell.

# May hath xxxj. dayes.

Now earth bemanled is, with flowers that abound,  
And birds record their notes, with sweet and pleasing sound,  
Lift up thy heart to God, with thanks for blessings sent;  
Let not his gifts unthankfully in vanity be spent.

# September hath xxx. dayes.

Ripe fruits, but sound, in measure eat,  
Now Spice you may eat with your meat.  
Now Dog dayes gone, bathe, purge and bleed,  
And Physick take, if that you need.

**A Table to know**  
when the Moon  
will be South  
for every day  
in the year.

## The Use of the Table.

days.	Hour.	Minu.	Day.
1	12	46	16
2	1	36	17
3	2	24	18
4	3	12	19
5	4	0	20
6	4	48	21
7	5	36	22
8	6	24	23
9	7	12	24
10	8	0	25
11	8	48	26
12	9	36	27
13	10	24	28
14	11	12	29
15	12	0	30

**T**he age of the moon being found in the Kalender (that is) how many dayes is past from the time of her change, **T**herewith enter this table, & having found it in the first column to the left hand, if it be before the full moon; or to the right hand, if it be after the full moon: you shall have in the middle column, her coming to the South, before or after, as is noted in the foot of the Table.

As for Example.

From the change to the full, the Moon comes to the South, after-noon.

From the full to the change, the moon comes to the South before-noon.

**T**he 21. day of February, the Moon is 6 days old, wherewith entering the table in the first co-

lumne to the left hand, right over against it towards the right hand, I find 4. and 48. shewing me her coming to South to be at 4. a clock, and 48 min: after-noon. And when it was 5. days old, as it was the day before, being the first day of February, her coming to the South was just at 4. a clock after-noon.

**B**

**A very**

A very plain and easie table to find the  
true interest due upon any Sum of mony,  
from five shillings to an hundred pounds  
for a year or under, after the rate  
of six pounds in the  
Hundred.

 night after Whitsunday at Darnton, and so every  
 Munday fortnight after until Christmas. The Friday  
 before Simon and Jude at Litchfield. And alwaies  
 on that day fenner as Michaelmas day is on, a great  
 Fair for Cheese, Horses, &c. at Wantage in  
 Bark-shire; And alwaies on Midsomer day a great  
 Fair at the same Town.

A Geographickall epitomic of the Map of ENGLAND  
and WALES, wherein is shewed how each Shire  
bounded and joyned to each other, and what Point of the Coast  
every County lyeth from the Honourable City of London; (being  
lately published) the use of which, and the next Table, is  
explained, on the back side of the other leaf.

You may read after the next leaf the whole compass, length and breadth of England and Wales, with the chief islands of note belonging to the said also the compass, length, and breadth of Ireland : but for Scotland, it is to be measured, the islands being so many, barren and scattered, as above 300.

**Alphabetical Catalogue of all the Shires, Cities, Market Townes, Castles, Parishes, Rivers, and Parks, in everie particular Shire in England and Wales; with the distance of miles, and points of the compass from London.**

# The Explanation & Use of the former Map & Table

**F**irst for the Map: The figures in each Shire of the map are to shew you the names of every County, & the Letters in the same are for such uses, as I will shew hereunder.

You must understand that London is in Middlesex, which County of Middlesex hath the figures of 22 in it, & the little black speck . 02 spot therein signifieth London. Now if you would readily find the name of any Shire therein, and how many myles the middle of the said County (in a straight line) is from London, & what point of the Compass it lyeth from the said City; resort then to the Table of Shires on the other side, and it will resolve you.

As for example, Barkshire it hath the figure of 1 in the map, & so it hath likewise in the Table; where it sheweth that the middle or heart of that Shire is 40 myles from London in a straight line, & it lyeth full west from the City and looking so: inward toward the right-hand, it sheweth it hath no City, 11 Markets, 20 Towns, 2 Castles, 140 Parishes, 3 Rivers, & 1 Parks. Again, Buckinghamshire hath the figure of 3 in the Map, & so it hath before it in the Table, the heart or middle of which Shire is from London 35 myles, & lyeth North west & by west from the said City, it hath no City, 11 Markets, 20 Towns, no Castle, 185 Parishes, 2 Rivers, and 15 Parks, and so of the rest.

The use of the Letters in the Map is this, S Scotland, I Ireland, F part of France, M the Isle of Man, W the Isle of Wight, L the Lizard point, H Holy-head, the \* the Irish Sea, B the British or English Sea, G the German Sea, Ba Barwick, D Dover, N Newcastle, C the points of the Compass, S the Scale of Myles, by which you may measure the distance of any place; for every black degree is five myles, so is every white.

The 39 Shires from Barkshire to Yorkshires are the English Shires, & the other 13 from Anglesey, to Radnorshire are Welsh.

It may be something further in Myles to the middle of each Shire, by reason of the crookedness of the Highways & Hills and valleys, but what is here set down is meant in a straight line from London, as is said.

Rules

## A Prognostication.

### Rules of Mensuration

**F**ingers breadth is four barley cornes in thickness, and an Inch three Barley cornes in length: Hands breadth four fingers: A span is three hands breadth: A foot is four hands breadth: A Geometrical Pace is five foot: an English Search is six foot  $\frac{1}{2}$ : A furlong is a hundred and twenty five paces, or six hundred twenty and five foot: An English Furlong is six hundred and threescore foot, or a hundred thirty two paces: A League is thousand and five hundred paces: An Italian Mile is a thousand paces, or eight furlongs: A Common German Mile is thirty two furlongs. An English Mile is eight furlongs. An Acre is forty Searches in length, and four in breadth.

**H**ow to judge what Weather will follow, by the rising and setting of the Sunne.

**T**he Sun rising bright & clear, signifieth a pleasant day: If he rise fiery red, it promiserh rain: If at his rising he be thinly overcast with a cloud, it becomeneth foul weather: If the sun drive the clouds before him into the west, it signifieth fair weather: If at his rising there appear a circle about him, & vanish away equally, it becomeneth fair weather. Also if he set red, it signifieth fair weather: If at his setting he be of divers colours, or clouds like water, it threatens rain. If at the rising of the Sun, his beams seem red, or long, or encompassed with red clouds it signifieth great winds: If at his rising there appear a thick mist, or if it raineth in the evening, it threatneth very foul weather to follow. Also if the Sun beams be spotted either green, pale, or black, or gathered to a cloud, it signifieth rain. The Sun setting clear without any cloud, signifieth a fair night to ensue. If the circle

circles, or circles about the Sun be clear, & of no consequence, look for faire weather: If there be many circles, it signifieth winds: the redder they are, the more vehement winds. If the circles are here & there broken, & are thick & black, look for cold wind or snow: or if he settle behind a great black cloud, rain follows.

How Weather is foreknown by the Moon.

If the Moon in the third day of her change, or 3 dayes before her full, or in the midst of the quarter, be round of pure light, nothing compassing her, the seas direct us, she promisseth faire weather: but bent to red colour, promisseth winds. The Moon pale, or somewhat black or thick, threatneth rain. When the Moon is five dayes old, mark the tips of her horns, if they be blunt, it signifieth the in: if sharp-pointed & picking upwards, great winds. If in the fourth day after her change, she have a red circle about her, it signifieth winds and rain.

Of the judgment of Weather by the Stars.

If the Stars appear of much light, and seem to be of more bignesse and blazing then ordinary. It betokeneth great winds and moisture in that part where they seem to; and in Winter, great frosts. When the Stars appear with long fiery tails, it threatneth winds, and great drought: the more in number, the greater shall be the effect. Also when Stars seem to shoot or fall, it signifieth great winds in that place: If they seem to shoot in divers places, it signifieth divers winds: If in all places, winds, thunder, lightning, and most tempestuous weather.

How to judge of the weather by the Clouds.

Black clouds flying from the east, signifieth Draine at night; if from the west, rain the next day; if they fly low, and appear to settle upon the tops of hills, it is a signe of cold weather, if they

be

## White, 1665.

be full charged, and appear white like to snows, hail is at hand: if white clouds appear in winter, two or three days together at sun rising, it is a sign of cold and snow; but black clouds signify rain. A red sky in the evening, and a gray morning is a sign of a fair day. Mist falling in the morning, in spring or harvest, also mists over ponds or waters in the morning shew rain. If the clouds fly swiftly in the ayre, it signifies rain from that part of the heavens, especially from the north or south. If thick white clouds gathered together in many places like flocks, or heeps of wool, appear in many places, it is a sign of rain: but if thick dark clouds towards the north or west near the earth, presently rain, and if like hills a little above the earth, foul weather is near. If mists descend from the hills, and settle in the valleys, it is a sign of fair hot weather next day, or if white mists arise from the waters in the evening.

How to judge of the weather by the Rain-bow.

The natural signification of the Rain-bow, is to shew rain either past or to come. The Rain-bow appearing when it is fair, is a sign of foul weather, when it is foul it is a sign of fair weather; the greener it appears, the more rain, the redder the more wind, if before noon then the rain is spent; if the rain-bow appear about one or two in the afternoon then rain is near. A rainbow in the morning is a sign of wet (unless there be brought in the air): if it appear in the evening it is a sign of fair weather (unless the air abound with moisture.) A rain-bow at night opposite to the moon, is a sign of much small rain and wind to follow. A rain-bow after long rain is a sign of fair weather presently; if two rainbows appear together, it is a sign of rain within one or two days after.

The proportion of the pound Avoir-du-pois to the pound Troy, is as 60 to 7, so that 60 pound Avoir-du-pois are equal to 7 pound Troy. The proportion of the ounce Troy to the ounce Avoir-du-pois, is as 7 to 8, so that 7 ounces Troy, are equal to 8 ounces Avoir-du-pois. Therefore the pound Avoir-du-pois is greater then the pound Troy: and the ounce Troy is greater then the ounce Avoir-du-pois.

When at 5 shillings the Bushell of Stryke, the Town Bakers penny white, is (by Troy) 7 ounces, 7 penny weight: by Avoir-du-pois 8 ounces: And the Country Bakers penny white (by Troy) 7 ounces 3 penny weight: by Avoir-du-pois 8 ounces and one quarter. If the Baker want one ounce in 36 ounces this 16 s. he shall suffer the Pillorie: without 2 s. 11 d. ad no action, 51 Hen. 3.

To

White. 1665.

To find the time of the Sun-rising, or setting, and consequently the length of the Day and Night throughout the whole

Y E A R.

**F**Or the ready finding of the Sun's rising and setting, I have added the subsequent Table, the use whereof is thus: In the head of this Table (consisting of fourteen columns) are placed the names of the twelve Moneths viz. January, February, &c. July, August, &c. and in the first & eighth Column thereof, are placed the daies of the Moneth, from 1. to 31. Moreover, in the head of the Table, under the names of the Moneths, is R<sup>is</sup>. S. S<sup>et</sup>, which signifieth Sun-rising, and Sun-setting, and below that is H. M. H. which signifieth, Hours, Minutes, Hours.

For example.

I would know the Sun-rising and setting January 10 first, I find January in the head of the Table, and in the first Column on the left hand I find the tenth da and right against the tenth day under January I find 7 50. 5. which shews me, that the Sun riseth at seven a clock, and fifty minutes past in the Morning and setteth at fifty minutes before five at night; and so for the rest.

Now if you would know the length of the day and night, do but double the hour and minute of the Sun's setting, and the sum is the length of the day; and if you double the hours and minutes of Sun-rising, you shall have the hour of the night.

Example.

The tenth day of January I would know the length of the day and night: I find (by the precedent directions) the Sun riseth at 7. hours 50. min. which doubled is 15. hours 40. min. for the length of the night: and 4. hours 10. min. the Sun-setting being doubled, makes 8. hours 20. min. for the length of that day.

## The use of the Table following.

**I**N the first place go to the Dominical Letter of the year, wherein you desire to know any moveable Feast: then finde the Golden Number for the same year, which is adjoyning to that letter: thirdly, in a straight line right against that number, you shall finde the moveable Feasts: As in example in the year 1645. the Dominical Letter is E, and the Golden Number 12, then next to 12, by the Letter E, followeth in a straight line 7 weeks and 4 dayes, to wit, (as the Title over the top sheweth) from Christmas to Shrove-Sunday, then February the 16, for Shrove-Sunday, Thirdly, April the 6. for Easter day. Fourthly, May the 11. Rogation-Sunday Fifthly, May 25, WhitSunday: and lastly, Novemb. 30. for Advent Sunday.

A Table

A Table to know the Dominical Letter, the Circle of the Sun, the Golden number, and the Epact for every year.

year of God.	Circle of Sun	Dom. letter.	Gold. numb.	Epact.
1644	1	GF	11	1
1645	2	E	12	12
1646	3	D	13	23
1647	4	C	14	4
1648	5	BA	15	15
1649	6	G	16	26
1650	7	F	17	7
1651	8	E	18	18
1652	9	DC	19	29
1653	10	B	1	11
1654	11	A	2	22
1655	12	G	3	3
1656	13	FE	4	14
1657	14	D	5	25
1658	15	C	6	6
1659	16	B	7	17
1660	17	AG	8	28
1661	18	F	9	9
1662	19	E	10	20
1663	20	D	11	1
1664	21	CB	12	12
1665	22	A	13	23
1666	23	G	14	4
1667	24	F	15	15
1668	25	ED	16	26
1669	26	C	17	7
1670	27	B	18	18
1671	28	A	19	29

For example, in the year 1671 the circle of the Sun answering thereunto is 28, the Sundays letter A. the Golden number 19. and the Epact 29 And the next year 1672. this circle beginneth again, for the circle of the Sun is 1. the Sundays Letter GF. the golden number 11 and the Epact 1. So that the circle of the Sun and the Dominical Letter begin after 28. years, the circle of the Moon called the golden number, and the Epact begin every 19. year, reckoning forwards in the circle for years that are to come, & backwards for yeares that are past.
